STEM

Lab Planner Selection

The committee to select the Science, Technology, Engineering and Math (STEM) Lab Planner interviewed two firms to design the STEM Lab: ED2, with offices in San Francisco, and Research Facilities Design (RFD), based in San Diego. The firm chosen will design the STEM Lab from the inside out, working with the architect to coordinate design of the STEM project. The committee met several days later and after discussion, elected to hire RFD as the STEM Lab Planner.

VERDE DESIGN

Gensler, the Facilities Master Planner for Measure H, has enlisted the expertise of Verde Design for athletic field planning in Santa Rosa. They have held several meetings with Matt Markovich, Dean of Kinesiology, Athletics and Dance (KAD), members of the KAD Faculty and the Verde Design Team.

Petaluma Science Building

A mandatory site walk for architects was held on January 27, 2017. Seven architectural firms participated in the walk through the Petaluma Campus. Leigh Sata, Director of Capital Projects, gave a presentation, with Ralph Gause, Senior

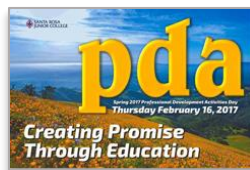

Buyer, Purchasing, and Gary Watts, Facilities Operations, Petaluma participating. The committee will interview six firms on February 28. Their goal is to take their final selection to the March Board of Trustees meeting for a vote.

LED PARKING LOT LIGHTS UPGRADES

You may have noticed a few parking spaces being closed for installation of LED parking lot lights. This Measure H Sustainability project is nearing completion and is expected to save \$13,000 a year in energy savings, while it reduces the Santa Rosa campus carbon footprint by 29,500 lbs. of CO₂.

Spring PDA Measure H Workshops

At Spring Professional Development Activities (PDA), Leigh Sata and others presented two workshops for Measure H: *How District Standards Impact Measure H Projects: Burbank Auditorium Modernization, A Case Study* and *How Will Measure H "up our game" at Each of SRJC's Teaching Sites?*

Additional presenters included Leslie McCauley, James Newman, Ari Poppers, John Fung, Gray Dougherty, Paul Bielen, Alicia Virtue and Scott Conrad. Thank you to the presenters and to all who attended. The PDA presentations are posted at <https://bond.santarosa.edu/other-presentations>

Burbank Auditorium Modernization Project

The design is complete and documents have been submitted to the Division of the State Architect (DSA), California's governing agency. DSA provides design and construction oversight for K-12 schools, community colleges, and other state-owned and leased facilities. Pending approval from DSA, construction is expected to break ground in August of this year.

The design team has met with faculty and staff to select material finishes for the building, as well as seating for both the main 400 seat auditorium and the 200 seat Studio Theater. TLCD/Mark Cavagnero Associates presented the final design and finishes to the Board Facilities Committee on February 7, 2017.
